We are very excited about this little gal! She is everything we hoped for, and more, out of this mating. At birth she is a lovely dark red and white with black nose, hooves, horn buttons and tail switch. Now her color changes with the season...grulla (dark and light), red, parker brown... We've never had one who's horns stayed lateral for so long, at almost 3 years, still no measurable upward turn of the horns.
